Total Unemployment Rate - as measured by the BLS, U-6 designation - all persons marginally attached to the labor force, plus total employed part time for economic reasons and marginally attached to the labor force.

Labor Force Participation Rate is the percentage of the total work-ready population participating in the work force. (Working, looking for a job, etc) This figure had held between 66 and 67 percent from 1989 until 2009.

The economy has hovered since August, 2013 at the lowest percentage of Americans participating in the labor force since the late 1970s.
