Democrats:

(At least the Democrats saved us money on ink.)

On April 17th, millions of small businesses in communities across America will be filing their first quarterly taxes under the new tax law passed by Republicans in Congress. They're joining countless other businesses and hardworking families who are already seeing the positive effects of the bill through higher wages, bonuses, and investments in expansion and hiring. Main Street small business now begins to benefit from tax savings that will allow the vast majority of Americans to keep more of what they earn. Ladies and Gentlemen, start your economic engines.

* The US Congress passed the Tax Cuts and Jobs Act in December 2017. The Bill passed on party lines with no Democrats voting for the bill.
