

# Fight For Higher Skills Not Job Killing Mandates

FIGHT  
FOR ~~\$15~~  
~~\$50,000~~

Congressional Democrats are rushing to introduce bills that would raise the federal minimum wage more than 106% to \$15 an hour. But wage mandates don't provide people with the skills to have \$50,000 careers—they simply hurt those seeking an entry-level job.

Entry-level jobs are rungs on the ladder to careers that pay \$50,000, like firefighter, plumber, mechanic, healthcare tech, and restaurant manager. And many of those careers don't require a college degree. Let's raise the wage ceiling, not the wage floor.

To get a good job, you need a first job.
