

## SMALL BUSINESS POLL

March 2024
Job Greators Network Foundation Small Business Poll

Conducted By: John McLaughlin Scott Rasmussen

## SMALL BUSINESS POLL

## Methodology

This national survey of 400 small business employers was conducted between March 1-18, 2024. This presentation includes JCNF's SBIQ (Small Business Intelligence Quotient). The Small Business IQ Poll tracks its SBIQ, identifies key trends, and offers valuable insights into policies impacting small business employers.

All interviews were conducted online with randomly distributed invitations. The geographic and demographic profiles were structured to represent the population of small business employers in the United States. The sample of 400 small business employers has an accuracy of $+/-4.9 \%$ at a $95 \%$ confidence interval. The numbers in this presentation have been rounded and may not equal $100 \%$.

The JCNF SBIQ is calculated on a scale from 0 to 100 , with 100 being best possible conditions and 0 being worst possible conditions. Small Business A score of 50 is neutral, anything above 50 is positive and anything below is negative. The JCNF SBIQ is based on 7-questions:
Intelligence
Current Conditions: Employer's Business, U.S. Economy, and Climate for Small Businesses
Quotient Future Expectations: Employer's Business Next 3-Months, Employer's Hiring Next 3-Months, Direction of U.S. Economy, and Direction

## Divergence Between Perception of Own Business \& National Economic Conditions

## SBC 5 "So-What" Takeaways

## SMALL BUSINESS POLL

1. One-third of small businesses with brick-and-mortar locations say elevated crime is cutting into their earnings. So What? Soft-on-crime policies are spilling over onto Main Street, having a tangible negative impact on small business operations.
2. 55 percent of small businesses affected by increased crime say homelessness and drug addiction are the biggest contributors, while 21 percent say the same about illegal immigration. So What? Small business owners are seeing firsthand how drugs and homelessness have consequences on their operations.
3. 75 percent of small businesses say they are most interested in hearing 2024 presidential candidates talk about the economy. So What? While the news media may be focused on "culture war" topics or Donald Trump's legal troubles, the small business community still cares most about the economy.
4. 44 percent of small businesses agree that their operations are at least somewhat being harmed by the Biden administration's border policies. That's why more than two-thirds support immigration reform that would secure the border and provide a path to "earned" legal residency. So What? The small business community is very supportive of smart immigration reform and is tired of the status quo.
5. The Small Business Intelligence Quotient (SBIQ), an index tracking overall small business sentiment about the economy, increased by 2.3points compared to January. At the same time, more specifically, 46 percent of small businesses say the economy is getting worse while only 27 percent say it's getting better. So What? Despite modest improvements in overall small business sentiment, Main Street is showing clear signs of anxiety.

Would you support or oppose immigration reform that secures the border and includes a way for undocumented immigrants currently here to "earn" legal residency through a variety of steps, including paying a fine, living in the country for several years without a criminal record or abusing welfare, and enlisting in military or community service, among other requirements?
